

) EWS-200

Windows based High End 3D Systems

) DESCRIPTION

The EWS-200 systems by eyevis are Windows based high-end 3D systems. The systems were especially designed for the smooth display of 3D processing power 3D on display screens with extreme high resolutions. Latest Direct X and Open GL make the systems ready for sophisticated three-dimensional applications.

High Performance

Latest generation processors and graphics cards guarantee optimal 3D performance for intensive computing on CPU und GPU.

High Resolution Graphics Cards

The EWS were especially designed for high resolution displays like eyevis' quad full HD monitors EYE-LCD-5600-QHD (3,840 x 2,160px) and EYE-LCD-6400-QHD (3,840 x 2,160px). Furthermore, you can connect up to 6 monitors to the EWS.

Expandable Input Connections

The EWS200 series can be upgraded with additional DVI and Video inputs. This allows connecting and further computers and video signals to the EWS200 and to show them on the display.

Full Administration

The installed Windows version (XP or Win 7) provide full administration of your system. If desired, the eyevis eyecon software can be used for administration of the system

Server or Desktop

The system can be used in a 19" server rack or in a tower chassis.
